

I fully support the comment submitted by The American Radio Relay League concerning Docket ET 03-104. I conclude the comments made by proponents of Broadband over Power Line (BPL) have little if any credible scientific data to support approval of this docket at this time. Further research in BPL is necessary in order to ensure this technology will not cause devastating interference to licensed services operating in the 2 MHz - 80 MHz frequency range. Approval of ET 03-104 at this time would violate the existing FCC rules on non-interference and would be contrary to the best interest of the public.
